Description

Within the scope of this offer, nerilio will be expanded with a dedicated assessment mode for HYROX Youngstars that enables automated knowledge testing. Users can start an assessment for the course assigned in the Lemon LMS; the assessment is conducted entirely as a chatbot-based dialogue.

The assessment is based on a centrally maintained question-and-answer pool in nerilio. Responses are entered as free text and evaluated by the chatbot on the basis of stored model and minimum answers as well as the provided course content. The result is determined in binary form as "passed" or "not passed", with a pass threshold of 80%.

During the assessment, users receive immediate but intentionally reduced feedback for each question, with the option to correct their answer once. A detailed evaluation is provided only at the end of the assessment if the user does not pass. If the assessment is not passed, it can be restarted immediately; if it is passed, the result is reported back to the LMS and used there for further processing, for example to create certificates.

For each completed assessment, a session-based log file is generated that documents the full process, including the questions asked, the answers given, and the respective evaluation. The logs are retained by the system and can be provided selectively on request if needed. Automatic provision of, or access by, users is not planned.

Integration within the LMS is handled by Lemon, including user assignment, authentication, and transfer of relevant parameters (e.g. user ID, language). Results are communicated via a defined interface. The functional scope is designed as a clear, scalable foundation and can be expanded in the future with additional options (courses, content, functions, ...).

Offer

nerilio Assessment Function for HYROX Youngstars

For: Lemon Systems GmbH

Date: May 7, 2026

Pos.	Description	Unit	Qty	Unit price	Total price
1	nerilio Assessment Function for HYROX Youngstars	Days	6	1,200.00	7,200.00 EUR
	Total				7,200.00 EUR

Notes

This offer is valid until June 12, 2026. All prices are exclusive of statutory VAT.

To place the order, simply return the signed offer to us.

All offered services are billed monthly based on actual effort plus any travel costs and expenses incurred. A down payment of 50% of the estimated total effort is due before service delivery begins. Deviations from the originally estimated total effort, both additional and reduced effort, will be taken into account in the final invoice and offset accordingly. Once 80% of the estimated total effort has been reached, a corresponding notification will be issued.

This offer is non-binding and subject to availability and errors.

Delivered goods remain the property of SNAP Innovation until full payment has been made. Our General Terms and Conditions of Delivery known to you apply.

Invoicing immediately after order placement; payment term: 30 days net cash.
